

Sterile SURGICAL KITS

We care for your Better Tomorrow

About Us

Safecare Medical Industries Was Conceived And Established In The Year Of 2016 By Bin Ali Group That Plans To Give A Different Dimension To The Medical Industries All Across The Middle East, Headquartered in Abu Dhabi, UAE, SafeCare is a domestic profit corporation providing quality medical devices products across all GCC countries. With its registered subsidiary factories and subsidiary offices across the UK, USA, Germany, and China, SafeCare thrives on producing and providing quality medical products across the globe. SafeCare Medical Industries has built a worldwide reputation for providing high-quality medical devices over the years. With a production area of 6,000 square meters, we manufacture all of our products in a controlled environment called a clean room of class 10000 (ISO 7) and 100000 (ISO 8). our manufacturing includes a wide variety of processes, including injection molding, blow molding, thermoforming, ETO sterilization etc., and all those that are required for a world-class medical manufacturing facility.

Sterile Surgical Kits:

Sterile surgical kits are pre-packaged sets of medical supplies and instruments used in surgical procedures. They are designed to be sterile, meaning they are free from any bacteria or other microorganisms that could cause infection. This is essential to prevent the spread of infection during surgery.

Sterile surgical kits typically contain a variety of items, including:

Surgical drapes: These are used to create a sterile field around the surgical site.

Surgical gloves: These are worn by the surgical team to protect both the patient and the team from infection.

Surgical instruments: These include tools such as scalpels, scissors, forceps, and retractors.

Other supplies: These may include items such as gauze, sponges, and needles.

Sterile surgical kits are an important tool in preventing the spread of infection during surgery. By using sterile supplies and instruments, healthcare providers can help to ensure that their patients have a safe and successful surgical experience
