

Sterile SURGICAL PACKS

We care for your Better Tomorrow

About Us

Safecare Medical Industries Was Conceived And Established In The Year Of 2016 By Bin Ali Group That Plans To Give A Different Dimension To The Medical Industries All Across The Middle East. Head quartered in Abu Dhabi, UAE, Safecare is a domestic profit corporation providing quality medical devices products across all GCC countries. With its registered Subsidiary factories and subsidiary offices across the UK, USA, Germany, and China, SafeCare thrives on producing and providing quality medical products across the globe. Safecare Medical Industries has built a worldwide reputation for providing high-quality medical Devices over the years. With a production area of 6,000 square meters, we manufacture all of our products in a controlled environment called a clean room of class 10000 (ISO 7) and 100000 (ISO 8). Our manufacturing includes a wide variety of processes, including injection molding, blow molding, thermoforming, ETO sterilization etc., and all those that are required for a world-class medical manufacturing facility.

As an industry-leading manufacturer of surgical Packs, Safecare Medical Industries provides a comprehensive selection of surgical Procedure packs that offers patients and clinicians the protection they want and all needs.

Our surgical packs contains, drapes options in AAMI Level 3 and 4 are engineered to meet industry testing criteria. In addition, you'll find all the features that clinicians prefer, including drapeable fabric and cord management features. Contents required for specific procedures.

Available in a range of materials and configurations to suit your requirements.

MATERIAL SPECIFICATIONS

SMMS: A hydrophobic, non-woven material comprised of three bonded layers of polypropylene; spunbond -meltblown-meltblown- spunbond.

2PLY LAMINATE: A two layer material comprised of an absorbent viscose top layer and a PE base layer.

3PLY LAMINATE: A three layer material comprised of an absorbent viscose top layer, a PE middle layer and patient comfort layer on the base.

SPUNLACE : A hydrophobic, non-woven material with a cotton feel comprising of cotton and a synthetic fibre, usually polyester.

PE Polyethylene: A plastic material either clear or blue in colour.

REINFORCEMENT : High absorbent material with a lock away core, which is used for reinforcing critical areas.

INCISE : Hypoallergenic polyurethane adhesive film surrounding or covering a fenestration to prevent microbial migration.

ADHESIVE : Hypoallergenic adhesive tape is a securement feature for attaching drapes to tables or patients.

ELASTICATED POLYMER: An elasticated material used around a fenestration.
